DESIGN DETAILS

Style inspiration from the Catens' Georgian townhouse

WOW WARDROBE

The doors of this custom-made closet were made in Vienna. They feature a wicker surface on a black iron structure with brass detailing. Combined with the tropical silk wall panels, they recall the exotic atmosphere of the Georgian townhouse.

DISTINCTIVE STAIRS

With its grand...

SECRET ADDRESS
At Mazzoleni, a Mayfair art gallery, we sourced some of the different works found throughout our interiors.

MOST SUCCESSFUL PART OF THE PROJECT
The fusion of the imperial London style, together with Dimore Studio's unique aesthetic.

GREATEST INDULGENCE
The custom-designed wall panels in the lower ground floor living room, which were entirely hand-painted.

GO-TO COLOUR
In this project, we prioritised a dark colour palette for several rooms through the unexpected mix of sophisticated mix of navy and dark green.

SMALL CHANGE, BIG IMPACT
A small portion...

A modern kitchen with white cabinetry, a large island with a white countertop, and a crystal chandelier. The kitchen features a curved island with a white countertop and a white cabinet base. On the island, there is a gas cooktop, a glass dome, a vase of white roses, and a silver trophy. The island is surrounded by white chairs. In the background, there are white cabinets, a built-in oven, and a large crystal chandelier hanging from the ceiling. The walls are a light beige color, and the floor is a light-colored tile.

INTRODUCTION

INTRODUCTION

Professional design and craftsmanship, with award winning services.

A well-designed kitchen is everyone's dream, and with the help of Danmar Kitchens it is within everyone's grasp. The perfect kitchen is a multi-functional room designed depending on the needs of the family. It is no longer just a room to cook in, instead it is the heart of the home, a room where the family can relax, entertain friends, or perhaps simply enjoy a pleasant environment where the children can do their homework while the evening meal is being prepared.

No two families are the same and their requirements differ, such as the available space and desired budget. This is where Martyn Ive and his team can step in, not only can they transform dreams into reality, but their extensive experience means that they can offer new ideas and innovative solutions to create a better kitchen.

Danmar is an independent trading kitchen company, this means that we provide our customers with the ability to decide their budget and function. Danmar will then discuss potential options or other ideas to ensure the customer is happy with the price and the product.

Our design studio is located in West Mall and our spacious studio offers customers an extensive range of kitchen displays, appliances and worktops.

Book a consultation with one of our professional team members. Customers can sit down and enjoy a hot drink while chatting with one of our design representatives. This is the perfect opportunity to discuss our huge variety of colours for both internal and external units from an array of manufacturers to ensure we find the perfect materials for the dream kitchen. With our grand selection of worktops, customers can explore what we offer, to decide what best suits their requirements.

After discussing the vision, our in-house team will work to create a selection of mood boards, enabling our clients to visualise their kitchen. We will manage alterations and provide one-to-one support to ensure that our customers are completely satisfied with their designs.

KITCHENS

PROFESSIONAL, TIMELESS, STUNNING

Danmar has the design and machine capability to create a stunning kitchen for our customer's home, putting the vision of the customer in the forefront to create a personalised dream kitchen.

Take inspiration from our portfolio to see our capabilities and how to best utilise the kitchen space. Every house has its own personality, quality features and styles. Enjoy a consultation with one of our designers, to encapsulate the vision of the kitchen, whilst our graphic designers create a 3D image of the space, incorporating colours and textures to allow our clients to visualise their home in real time.

We will tailor the clients experience at Danmar to best suit their needs. Our ranges are suitable for both commercial and residential use, and can be modified to fit the needs of all families.

“The work was outstanding, from truly creative design, high quality manufacturing, expert fitting, and especially, perfect finishing”

Danmar's Contemporary Range

Why choose a contemporary kitchen? Nowadays there is a vast amount of choice for colours, textures and styles so deciding which manufacturer best suits our customer's contemporary needs, is important. Danmar works with the company Xylocleaf, their selection of original and one off cabinetry provides a nice shake up in styles of what most people thought possible to have in their homes. This variety allows our customers to explore more styles and not feel that they're limited to a dozen of colours, making their kitchen truly personal.

When it comes to clients choosing the right worktop for their home, Danmar has a grand variety of different companies, all with a large range of styles, textures and patterns. Danmar works with companies such as Ceas-erstone, Lapitec, Dekton, Cambria and Cilestone. All of which have great differences in prices and styles, so with Danmar's extensive collection we can create a variety of mood boards for visual aid.

CONTEMPORARY KITCHEN

Socialise with friends around an inviting island!

Here we have a modern two tone, high gloss kitchen. The choice of colours for this kitchen, gloss white and metallic grey are excellent as they compliment the contemporary style. The design effortlessly promotes a sociable atmosphere, through the central island, without limiting the functionality of the kitchen.

The smart layout of the appliances help make the kitchen feel modern and advanced, making life easier for the user. The integration of a double oven, coffee machine, wine cooler, hob and extractor fan compliment the modern style and exaggerates the high-end finish. This integration is always beneficial for ease of access for our customers.

Having an island is always a stunning feature to add to any kitchen, incorporating additional worktop and storage space, whilst also providing a dining solution. The island can be tailored to suit our client's needs; whether the primary purpose will be for additional seating, or a modern cooking worktop, Danmar will design the layout to best fit the client.

“Danmar designed and fitted my beautiful cabinetry. I used them because they’re known for high end innovation & quality”

Danmar's Traditional Range

A traditional kitchen always creates an elegant and homely atmosphere. The neutral colours feel softer and inviting for friends, and family to gather in and socialize while everyone helps chip in for making Sunday lunch.

With our vast machine capabilities we are able to produce beautiful bespoke joinery for a traditional room, with around the room high quality detailing; mantel piece, doors, tongue and groove panels and cornice to really bring traditional life to your kitchen.

Danmar will help guide a customer with which appliances will best suit the style of your home and the style of cooking. We can provide traditional Agas that will match the style or we can provide traditional cabinetry and then easier access modern appliances. In a traditional kitchen, large metal knobs and handles best suit the traditional style as they have an appearance of being handcrafted and the designs are aged as they have been used for many years.

CONCEPTUAL KITCHEN

Bold & inviting kitchen to wow family & friends

Here we have a stylish take of a conceptual kitchen that uses a light but bold colour scheme which optimises storage space and is personalised to match the cooking needs of our client. Firstly, looking at the colour choice, the majority of the units have been hand painted in Ichira Blue, which compliments the lighter colours used from the Dekton Enzo worktop and the custom leather island worktop.

Our customer for this kitchen is real foodie who loves cooking and preparing meals for family and friends. The choice of appliances and layout were a key feature when designing this kitchen, the hob, ovens, plate warmers and microwave have been housed in a tall larder unit all aligned for making cooking easier, as well as having enough space to entertain and feed plenty of guest.

As cooking was such a big influence for this customer, smart storage needs to be taken into consideration. We incorporated intelligent designs to cater for the storage spaces, providing a combination of different size cabinets and drawers, to ensure equipment could be stored away effectively.

Danmar's Traditional Oak Range

Stunning handcrafted oak furniture is made here at Danmar, using our workshops high end machinery with our sublime British Craftsmanship that is created on-site for a customer's dream kitchen. As we have few limitations from our craftsmen regarding styles and preferences, we can create a truly bespoke kitchen for our customers, from the plinth to the cornice.

Danmar's Bespoke Oak Features

The decision to have an oak kitchen is always a beautiful choice. A handcrafted oak kitchen by Danmar will always have the fine detailing and exquisite design that most people expect and require when having a bespoke kitchen. All pieces are handcrafted and created by one of our highly qualified and precise joiners.

BEDROOMS

ORIGINAL, DISTINCTIVE, EFFORTLESS

At Danmar, we work with a diverse range of materials and finishes. Whether it's solid wood, veneer, or a textured melamine, we offer it all.

The beauty of a Danmar Kitchen is we don't have catalogues. All our furniture is made specially to suit. Therefore we have very few boundaries. Not only are our cabinets made to measure, they can be made using any material we can source from our suppliers.

Have a colour you love...? Not a problem. Our state of the art spray booth means we can colour match and paint furniture to any colour. If you're after the traditional finish, our team of decorators will hand paint the furniture onsite. While there are greater limitations doing this, the beauty is you can have it repainted as and when you like. Any damage caused through wear and tear can be rectified on site.

We pride ourselves on detail, both in the design and the manufacturing stages. All our veneers and grain effect melamines come grain matched. This means that on a cupboard with multiple doors, the grain flows across all panels rather than having a staggered look. We can also grain match entire kitchen islands using a horizontal or vertical grain.

Stunning & timeless furniture for all styles

In this image we have one of our traditional fretwork bedrooms, using a light colour palette allowing the room to feel elegant. A key design feature of this bedroom, is the built-in wardrobes. This feature is aesthetically pleasing as the wardrobes achieve such a clean finish, all edging can be filled in creating a flushed finish making the wardrobes part of the room.

This integration creates a sleek finish, meaning that a lot of space is saved around the rest of the bedroom for decorative pieces or furniture. This also allows the option for beautifully planned and bespoke smart storage options which can be tailored to our customer's fashion or functional needs.

Danmar's 3D Features

The Danmar designers are professionally trained and qualified to use AutoCad programs. These qualifications allow Danmar to create stunning and to scale designs of our customers furniture, helping our clients see the fine detail of their new wardrobes and how the styles will fit in with their room and current home décor.

“They’ve always showed excellent customer service in helping me; new ideas, new equipment and other ways to consistently enhance my kitchen”

MR & MRS JEFFERIES

Sevenoaks, Kent

Contemporary Furniture

For the easy maintenance, cleaner friendly kitchen, we offer a vinyl wrapped design. Using a heavy duty, robust vinyl which comes in a range of matts, glosses, textured and woodgrains, we heat shrink these onto our MDF panels which can be CNC cut into a variety of styles.

Made to measure and fully customisable, these are a huge hit with families with young children or animals. Simply wipe down with a weak bleach solution and they're as good as new again.

STUDIES

ELEGANT, CHARMING, STYLISH

Danmar's Studies

When designing a new study there are a many key features we will think about and ask our customer, to ensure that we find out how to make this work space truly bespoke and personal. Asking lots of questions about future work in order to achieve a better understanding what storage solutions suits our customer, wheter it be space for filing or open base units for computers or both and more. Individually discussing the purpose of each unit and draw, all to ensure that we are personalizing our client's studies to their exact needs and styles.

Also, creating fully purposeful units to make life easier, we can also add smart and discrete AV/media racking on the furniture (that may require it) maintaining with the sleek and professional finish. Another upside to the media racking is the maintenance and protection of the cables, the racking that will be used keeps the cables secure and prevent them getting tangled which can damage them. If security is important for our customer we can provide security cameras around the study in discrete locations so they will not stand out or become an eyesore.

“The fitting team were efficient, skilled, tidy and reliable. All are very friendly at Danmar, making us feel invited from the start.”

CONTEMPORARY STUDY

Crisp and elegant study to calmly work in.

For this study, we created an elegant and inviting workplace to feel relaxed and promote productivity. The room also incorporates smart storage solutions to ensure the workspace is kept clear. For the smart storage, draw packs have been integrated to create an ideal place to keep stationary and documents, whilst being easily accessible to the user.

The choice of colour being all white allows for a crisp work space, as well as promoting a bright and open space. The choice of the floating shelves accompanies the open plan design as it creates a modern display opportunity.

Display Cases

Open shelving units are an excellent way to show off subtle contrast in the furniture. Dependant on the size of the room, open shelving can make the room more spacious, whilst also providing a storage solution, allowing families to effortlessly display special items.

“The team suggested helpful storage options that I wouldn’t have considered. Our fitters were brilliant & they worked extremely quickly. Amzing job!”

MR & MRS JONES

Kings Hill, Kent

Danmar's Promise

The Danmar design team takes great pride in offering a full customer service from start to finish. From the moment you walk into the show room we will guide you on design layouts, and material options , offering great colour choice and door designs to work with your home. We have a dedicated cgi team that generate realistic room plans that aid you on the completion of your final design and touches.

We also like to think besides using the best materials for your kitchen, that the longevity is second to none and our price structure will suit all budgets in a very competitive market place. Danmar`s in house fitting team work along side out in house architect to make the perfect fit, professional and tidy service.
